# Beet Powder

We are pleased to introduce Beet Powder. Beets are a root vegetable from the *Chenopodiaceae* family known for their distinct flavour and vivid colour. Beet Powder is a convenient method of adding these traits without the actual vegetable.

Add Beet Powder to sauces, gravies, salad dressings, coulis, soups, and stews for both flavour and colour.

Create a delicious rub for meat such as pork, as well as fish.

Add colour to your pasta by mixing in beet powder. It is the perfect way to make a unique tri-coloured dish.

Beet Powder is a natural colourant that is wonderful for baking cakes and cookies, or making icing.
