# SESAME SEEDS TOASTED

Sesame Seeds Toasted is the latest product that we are proud to introduce, that provides convenience and flavour to your culinary creations.

These oil-rich seeds are cultivated from the flowering plant of the *Sesamum* genus native to Africa and India. The nutty flavour they provide allows for their diverse use.

In providing Sesame Seeds Toasted, we have removed the potential of burning the seeds, which easily occurs, and allows for an ease of use in a wide variety of applications.

Use Sesame Seeds Toasted in salads as well as meat, fish and poultry dishes, and stir-fries.

Incorporate them into your bean or noodle dishes for an additional layer of flavour.

Roll goat or any other soft cheese in the seeds to make a unique cheese plate.

Toasted Sesame Seeds are also great for baking. Use the seeds in your cakes, cookies, breads, or mix into butter for a delicious spread.
