

LIME SALT

We are pleased to introduce our new Lime Salt. Limes are grown in subtropical and tropical regions, and are the smallest member of the true citrus family. The refreshing flavour and distinct aroma of limes take very well to strong flavours such as chili and garlic, and therefore are often used to complement spicy dishes. Tart but not sour, our Lime Salt is the perfect ingredient for a multitude of applications.

Perfectly suited for Thai and Asian inspired dishes, our Lime Salt is also a wonderful ingredient for steamed vegetables, guacamole, salsa, salad dressings, and soups.

Lime Salt is a great companion for seafood such as shrimp, scallops, and white fish fillets. It is also a great ingredient in marinades and rubs for seafood, chicken, and beef.

Whether used for the classic margarita, caesar, daiquiri or your custom martini. Lime Salt is perfect for rimming drinks.
