# PEPPERMINT RUBBED

We are pleased to announce the release of our latest product - Peppermint ! Popular in cuisines all over the world, peppermint is the most pure form of the desired 'mint scent' that is sought after for its pungent and refreshing odour.

Peppermint is actually a hybrid of two varieties of mint - spearmint and water mint. These deep green, long, pointed, and crinkled leaves are full of menthol and will find their place in many aspects of your menu.

Peppermint is often used in dessert dishes. Chocolate creations, such as brownies, cakes and tortes, and cheesecakes, are perfectly complemented with peppermint.

Peppermint can also be mixed with fruits, and used to make ices, sherbets, and frostings.

Add a fresh bite to traditional dishes by accompanying vegetables such as potatoes, carrots, tomatoes, and peas with peppermint. Create an unique 'pesto' by combining peppermint with macadamia nuts and honey, or simply add peppermint to your house salad dressings, and soups.
