

STRAWBERRY FLAKES

We introduce Strawberry Flakes to our product line! Strawberries are the perfect summer fruit, full of juice and flavour but are very difficult to transport and keep fresh due to their fragile nature. The Strawberry Flakes allow you to have the true taste, colour, and aroma of strawberries all year round.

Strawberries are a member of the rose family, and these low growing plants have been cultivated since the 13th century. The wild varieties have been used since Roman times, where they were valued for their therapeutic powers.

The most common strawberry is actually a cross-breed of the wild Chilean and North American varieties

The Strawberry Flakes are perfect for sauces, salad dressings, and desserts.

Add them directly into cream cheese for a rich and delicious cheesecake, or into icing for both colour and flavour.
